7000 Series

SAMSUNG

The smarter way to do business

OfficeServ 7030, 7100, 7200S, 7200, 7400

The OfficeServ 7000 series has been designed to deliver advanced voice, data and wireless communications in a single IP platform.

Businesses can deploy OfficeServ 7000 to build sophisticated telephony applications, secure data-communications infrastructure and policy-driven networks. OfficeServ 7000 series has a comprehensive range of features and functionality and offers an effective, affordable solution for any organisation. So, whether you are a small office, a head office or a branch of a larger organisation with a need to take advantage of cutting-edge solutions, the OfficeServ 7000 series becomes heart of your communications network.

Modular design for efficient scale

The OfficeServ 7000 comes in five variants, from the entry level 7030 to the 7100, 7200S, 7200 and 7400. The systems can be configured to accommodate 4 to 480 extensions at a single site and combined to link 1,000 sites. Systems use common interface modules and can utilise the same software applications and terminals.

Feature Richness

OfficeServ makes unified communications solutions deployment simple, without sacrificing features and functionality for mission-critical business applications: security systems, policy management and advanced telephony.

Voice Messaging

All of the OfficeServ systems in the range have a powerful voice messaging Capability, including large capacity recording, the ability to send your voice message to email. Other high end facilities include Q&A mailboxes, group mailboxes, personal auto attendant and the ability to process faxes can also be enabled.

Applications

The OfficeServ systems provide a platform for a whole range of applications including, generic personal productivity, presence and messaging as well as more specialist applications for Call Centres, Hotels, Healthcare and Taxi companies.
